04 / TAKE IT INTO YOUR BUSINESS

Your everyday AI toolkit

Start with one repeated task. Give it a clear brief, then check the result.

Business day	What changes
08:00	Enquiry → validate → record → draft → human review.
08:15	Reply to a client; plan three posts and save a Sales & Content Kit.
10:00	Inspect an RFQ and the passages supporting the answer.
13:00	Analyse supplies and independently check the numbers.
15:00	Build a tool from explicit rules and known test cases.
17:00	Choose a workflow to test in your own business.

Three different things

An AI draft: you request an output and review it.
A reusable tool: the calculator applies agreed rules when you use it.
A connected automation: an event triggers work across configured apps.

> **WHAT TODAY DEMONSTRATES**
>
> The workshop workflow lab uses local rules and a fixed template. It has no AI or email connection and sends nothing. A completed plan is not an installed integration.

04 / Participant worksheet

Your first workflow

Choose one 15-minute experiment for Monday, 2 November. Use authorised information and decide what a useful result looks like before starting.

1. Trigger - what starts the work?

2. Steps - what happens next?

3. Reviewer - who checks what?

4. Exceptions - what happens when information is missing?

5. Measure - what will you check over the first five runs?

Compare accuracy, edits needed, time and cost before adding a subscription.

04 / Checked reference values

Keep a number you can check.

Example	Checked result
Stock revenue	KES 179,640
Cost of goods sold	KES 149,345
Gross profit	KES 30,295
Floor cleaner contribution	KES 9,100
100 m² / 3 visits / windows	KES 34,104
400 m² / 3 visits / windows	KES 115,536

BEFORE USING A RESULT

Overheads are absent, so net profit is unknown. Confirm rates and the 16% tax assumption before issuing a quotation. Unresolved window scope must be clarified before a real quotation.

RFQ facts

Submission: 6 November 2026, noon EAT.
Site visit: optional.
Window count, size, height and external access: not specified.

Use the numbered source sections in the RFQ PDF to verify each claim.
