ONE BUSINESS / ONE WORKING DAY

Meet Safi Services & Supplies.

Office cleaning. Cleaning supplies.
A small team with a full day ahead.

MORNING

Enquiries, marketing and an RFQ.

AFTERNOON

Stock decisions and an estimate.

Leave with a checked draft and a routine you can reuse.

08:00 / AN ENQUIRY ARRIVES

When the same steps repeat.

Enquiry → **Record** → **Draft** → **Review**

A clear trigger

Check for duplicates

Pause if facts are missing

A person approves

Open the working local example ↗

Fixed rules in the browser. No AI or email connection. Nothing is sent.

Three different ways to get help.

A draft

You ask.
The AI suggests.
You review.

A tool

You open it.
It applies agreed rules.
You check the result.

A workflow

An event starts it.
Connected steps run.
Exceptions reach a person.

Make · Zapier · n8n can connect authorised apps after setup.

08:15 / SALES & MARKETING · CHATGPT

A lead waiting. A quiet business page.

The owner is out on a job.

A contract enquiry sits in WhatsApp.

Safi needs to reply today and keep attracting suitable customers next week.

Two useful results

A reply that moves the enquiry forward.

Three posts built around customer questions.

One saved brief for the next run.

Same method: an interior-design proposal, an admissions enquiry or a retail campaign.

Give the client a useful next step.

400 m² · three evenings a week

Monthly windows · details still missing

KES 120,000 is the client's budget

16 November is a requested start date

Copy the full client-reply prompt ↗

08:45 / BRING IN THE NEXT ENQUIRY

Who is this post for?

AUDIENCE

Office managers in Parklands.

OFFER

Office cleaning, scoped before pricing.

NEXT STEP

DM OFFICE + location, area, schedule.

MEASURE

Qualified enquiries after seven days.

Run the weekly marketing brief ↗

Aim for three qualified enquiries. A target, not a promise.

Three posts. Three different jobs.

Monday

Answer a question.

What details help us quote?

A simple checklist graphic.

Wednesday

Explain the process.

How do we plan around office hours?

Your own equipment photo.

Friday

Invite an enquiry.

Planning regular cleaning?

DM OFFICE with three details.

A useful answer. A clear next step.

Check facts and the image. Publish manually. Record actual enquiries.

KEEP IT / SALES & CONTENT KIT

Next week should start here.

Save

One business brief.
Two prompts.
One approved example.

Update

New client notes or a new weekly goal.
Keep private notes out of public copy.

Review

Check the draft.
Publish yourself.
Record enquiries and next steps.

Copy the kit & get the editable planner ↗

Keep it in a document you can open on your phone. Name the person responsible.

YOUR TURN / 3 MINUTES

One draft you can use again.

Choose a reply or a post.
Change the brief.
Check one claim. Save the result.

No account open? Pair up or edit the prepared reply.

10:00 / THE RFQ ARRIVES · NOTEBOOKLM

A good proposal can still lose.

The client now wants a formal bid.

A missing document or a misunderstood deadline can undo the work. Window scope still needs an answer.

What we need back

A checklist tied to the current RFQ.
Only the stated rejection grounds.
Questions, owners and due dates.

The decision: can we submit a complete bid, and what must we clarify first?

Where does that answer come from?

6 Nov

12:00 noon EAT

Submission deadline · Section 4

Open the citation.

Read the passage.

Check the interpretation.

The site visit is optional.

Open the source & compact checklist prompt ↗

“Not specified” is useful.

> How many windows?
> What size and height?
> Can we safely reach them?

The source does not establish those answers.

Ask a clarification question before quoting.

KEEP IT / RFQ REVIEW FOLDER

A checklist someone can act on.

Keep the source

One notebook per opportunity.
Current RFQ and official updates.

Assign the work

Requirement → evidence.
Owner → internal due date → status.

Recheck changes

An addendum changes the evidence.
Review the affected answers again.

Save your RFQ review routine ↗

Start a task. Inspect it later.

GOAL

A cleaning quote calculator.

DELIVERABLE

One offline HTML file.

RULES

Area, visits, windows, tax assumption.

CHECKS

Known totals and invalid inputs.

Copy the Codex brief ↗

13:00 / STOCK & MONEY · CHATGPT

Sales are up. Is the cash working?

The owner needs to buy stock again.

Some supplies sell quickly. Others tie up cash on the shelf. The sales sheet has eight products and 30 days of figures.

What we need back

Profit contribution and slow movers.
Calculations we can reconcile.
Questions to resolve before ordering.

The decision: what to replenish, hold or investigate after checking cash and lead times.

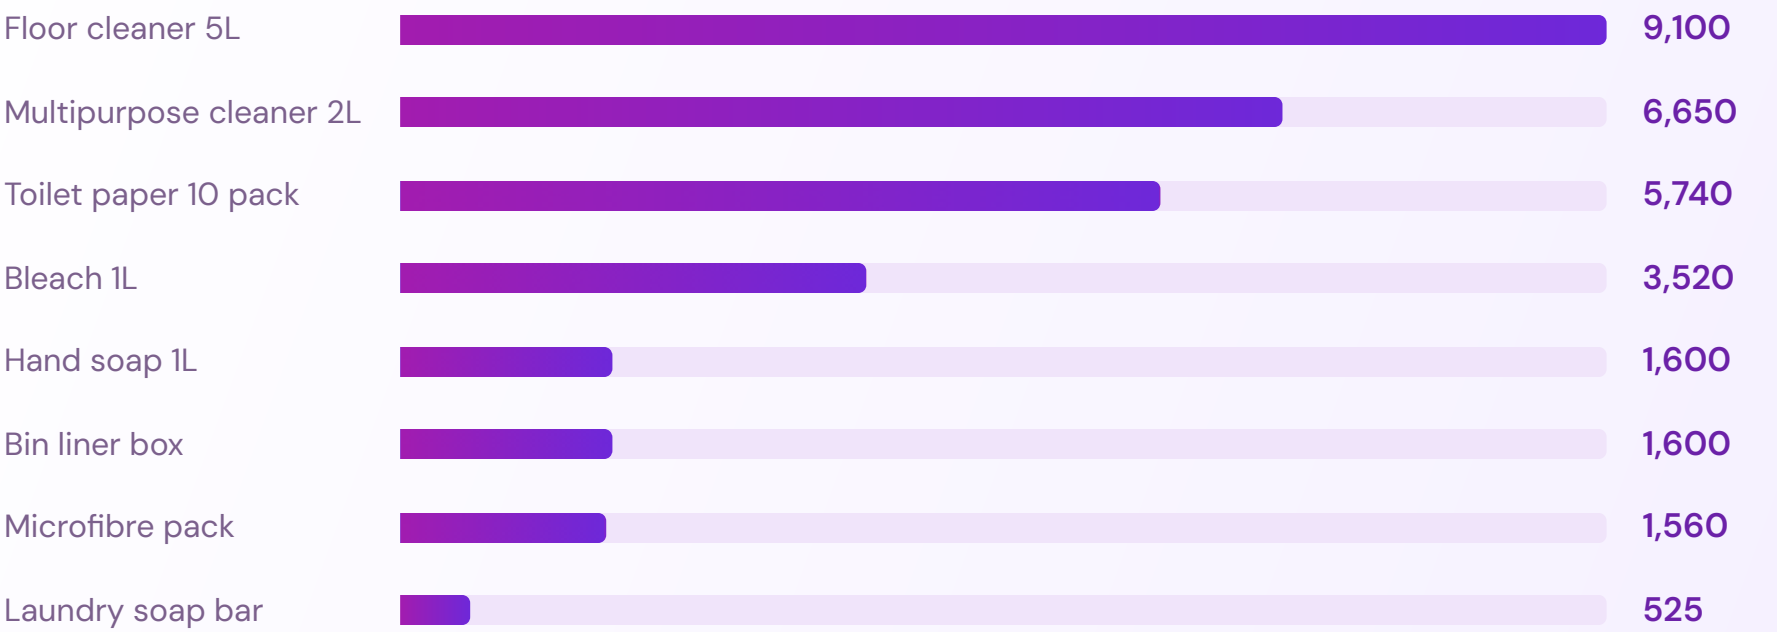

Which product earns the most?

Product	Sold	Cost / unit	Price / unit
Multipurpose cleaner 2L	95	310	380
Floor cleaner 5L	70	720	850
Bleach 1L	88	170	210
Microfibre pack	12	350	480
Toilet paper 10 pack	82	380	450

Selected rows from the 30-day dataset. Amounts in KES.

Open all eight rows & the analysis prompt ↗

Floor cleaner contributes the most.

Gross profit from units sold, in KES. Independently checked reference chart.

Check a row. Check the label.

30,295

KES gross profit

Revenue **KES 179,640**
Cost of units sold **KES 149,345**

Overheads are missing.

Net profit is unknown.

Floor cleaner: 70 × (850 − 720) = KES 9,100

KEEP IT / MONTHLY STOCK REVIEW

Same review. Fresh numbers.

Duplicate

A master spreadsheet.
A dated source export.
The same saved questions.

Reconcile

Totals and two worked rows.
Check restocks, returns and price changes.

Record

Buy, wait or investigate.
Reason, approver and review date.

Copy the monthly review template ↗

15:00 / A REUSABLE ESTIMATE · CODEX

Tomorrow brings another enquiry.

Stop copying the same formula.

Safi needs an estimate the team can reopen, change and check on a phone. The rules must be agreed before the tool is built.

What we need back

A working calculator file.
Clear rates and assumptions.
Known totals and invalid-input checks.

The decision: is this approved for estimating, and what remains before a final quote?

The work includes the checks.

Brief → **Build** → **Test** → **Review**

Goal and rules | Actual files | Known cases | Your decision

A finished-looking screen still needs testing.

A quote in a few clicks.

YOUR CLEANING PLAN

Floor area square metres

400

Visits per week

3 visits per week

☑ Include monthly window cleaning

KES 6,000 per month

ESTIMATED MONTHLY TOTAL

Ksh 115,536.00

13 average visits per month

Routine cleaning	**Ksh 93,600.00**
Windows	**Ksh 6,000.00**
Subtotal	**Ksh 99,600.00**
VAT (assumed 16%)	**Ksh 15,936.00**

Estimate inputs: KES 18/m²/visit, 52 ÷ 12 weeks/month. The estimate assumes 16% VAT on both cleaning and windows. Actual visits, scope and applicable taxes need confirmation.

Under budget is not ready to send.

115,536

KES monthly estimate

KES 4,464 below the client's budget.

What is still unknown?

Window scope.

Safe access.

Availability.

KEEP IT / SAVED ESTIMATE CALCULATOR

One approved copy. Easy to reopen.

Keep

The checked file and backup.

A bookmark or reviewed team URL.

Own

Rates, assumptions and review date.

One person responsible for pricing.

Retest

Known totals after every rule change.

Missing inputs must still show errors.

Copy the simple calculator handover ↗

A local file is not automatically a website. Test the actual link you share.

17:00 / YOUR BUSINESS

Design one repeatable workflow.

What starts it? What happens next?

Who checks it? What could go wrong?

What will you measure in the first five runs?

Write your workflow plan ↗

Start with the job.

Use what you have.

Try a small task.
Check accuracy and edits.
Compare time and total cost.

20 tasks · 27 tools · official sources ↗

Explore what comes next.

More marketing and presentations.
Meetings and procedures.
Support, research and translation.

What does your business need done?

The task.

The information you have.

The result you would check.

One task on Monday.

A clear brief. A check. A person responsible.

dadahubaitoolkit.vercel.app/toolkit

Prompts · marketing planner · reusable guides · offline kit

APPENDIX / FALLBACK ROUTE

Keep the lesson. Change the screen.

If a tool stalls

Opening: allow 30 seconds.
Later responses: 45 seconds.
One recovery attempt.
Then identify the prepared fallback.

If time runs short

Skip chart generation.
Skip the print enhancement.
Protect participant practice.
Finish at 10:20.

Exact words, prompts and fallbacks ↗

APPENDIX / EVIDENCE AND ASSUMPTIONS
